🔗 [Portfolio](#)

## Summary

- Dynamic Full Stack Developer & Solution Contractor with 5+ years of hands-on experience in full life-cycle development.
- Specializes in Repository Design Pattern & Clean Architecture, delivering scalable and maintainable solutions.
- Exhibits coding excellence through a strong focus on testing and debugging, grounded in robust Object-Oriented Programming (OOP) principles.
- Demonstrates proven experience in Agile Methodology across all phases of the Software Development Life Cycle (SDLC).
- Innovates app and feature development using cutting-edge technologies, driving business growth and operational efficiency.
- Adheres to DRY principles (Don't Repeat Yourself), promoting efficient and reusable code practices.
- Driven learner and growth enthusiast, committed to continuous improvement and delivering excellence within the organization.

## Skills

### Backend

- .NET Core / ASP.NET (MVC)
- Entity Framework
- C# Web/REST API
- MS SQL / Mongo / Cosmos DB
- Dependency Injection
- Rest API's
- Third Part API's Integration
- Nodejs

### Front End

- HTML/CSS
- JavaScript/jQuery
- Bootstrap
- Sass, Less
- Razor Pages
- ReactJS
- NextJs

**Languages:** C#, JavaScript, Html, CSS, SQL, PL/SQL

**Tools:** MS Visual Studio 2022, SQL Server Management Studio, Git, GitHub, Bitbucket, Visual Studio Code

**Databases:** My SQL, MSSQL, Mongo DB, Cosmos DB

**Utilities:** MS Office, Outlook, TeamViewer, Windows, Linux, Mac OS

**Web Technologies:** JavaScript, React JS, Bootstrap, CSS Preprocessors (Sass, Less)

## Education

### Bachelor's in Software Engineering

Superior University, Lahore

## Experience

### Full Stack Developer

Nodlays

Jul 2019 – Present

- Engineered and optimized 10+ high-performance web applications, applying advanced object-oriented programming techniques to achieve a 25% increase in scalability and modularity.
- Directed the design of secure databases and web apps, ensuring 100% data integrity and confidentiality compliance.
- Developed and maintained 15+ RESTful APIs with .NET Core and Node.js, ensuring 100% seamless integration by following best practices.
- Devised and executed performance plans, elevating project efficiency by 20%.
- Consistently delivered results 10% ahead of deadlines in a high-pressure environment.
- Deployed multiple high-performance apps, optimizing user experience and performance by 30%.
- Championed a cross-functional team of 5, streamlining project workflows and achieving a 15% reduction in time-to-delivery.
- Managed project lifecycles from concept to deployment for 3 major initiatives, improving overall team productivity by 25%.

### Junior Web Developer

TechLogs

Feb 2018 - Mar 2019

- Collaborated with stakeholders to implement design best practices across 10+ React and .NET projects, ensuring creative proposals were effectively integrated.
- Orchestrated full-cycle design tasks for 5 major initiatives, overseeing each phase from conception to completion while maintaining strict adherence to design guidelines.
- Leveraged expertise in React, JavaScript, HTML, and CSS to create 7+ user-friendly interfaces for .NET applications, enhancing user engagement by 30%.
- Ensured data integrity by meticulously cleaning and filtering imported data in 15+ .NET applications, achieving 100% accuracy for critical reports.
- Managed the development lifecycle for 4 company web applications, successfully delivering high-quality, scalable solutions using React and .NET technologies.
- Utilized SQL queries to analyze data across 10+ applications, contributing to informed decision-making and improving data retrieval efficiency by 25%.

### Developer (Intern)

Experts Batch

May 2017 - Dec 2017

- Engineered web applications using Django and Laravel, leveraging Photoshop and Dreamweaver to improve project delivery speed by 20%.
- Collaborated with senior front-end developers to design tailored web solutions for 10+ clients, ensuring precise alignment with requirements.
- Enhanced client satisfaction by 15% through effective communication and the integration of feedback during design presentations.
- Assisted in debugging code across 5+ projects, improving website performance and user experience ratings by 25%.
- Developed modern user interfaces with JavaScript frameworks, HTML5, and CSS3, achieving a 99% success rate in cross-device and cross-browser compatibility tests.
